Male Reproductive History

So that we may better address your concerns please take the time to fill out this questionnaire detailing your pet's medical history prior to your appointment.

Please list any current medications or supplements and any ongoing health issues:

Date of last Brucellosis / Do you need a Brucellosis test done at your appointment?

Male name and age:

Male ID (if applicable microchip #, AKC registration ect.):

Do you plan on shipping fresh chilled semen or freezing semen in the future?

Previous Breeding History:

Is the male a proven sire?

Has he been used for natural breeding? Has he previously been collected?

Type of semen previously used (fresh, fresh chilled, frozen):

Does he have frozen semen stored? What is the post thaw motility of the frozen semen?

Has a semen analysis previous been performed? What was the quality of the semen (sperm count, motility, morphology)?

Number of previous litters:

Date of last breeding:

Outcome of last breeding (pregnant, not pregnant, how many puppies):

Please bring copies of any pertinent medical testing: recent blood work, previous semen analysis reports, culture results or biopsies.
